

Update: Keshe Arizona | Distributor's Story | Factories Around the World

PLASMA TIMES

Keshe Manufacturing Arizona

Factories Around the World

Much is happening around the foundation especially in the area of construction of factories around the world. The factories are being set up in a way where every factory will be similar to the others and will be state-of-the-art facilities.

This requires a lot of preparation and modifications of existing buildings or new construction to become similar and have the same equipment and infrastructure.

Factories are planned and waiting final approvals. Once the first prototype factory is built in Ghana, whatever problems can occur will be identified and solved prior to showing up in the next factory. The Ghana facility is being finalized with all the equipment and tested for effectiveness.

Updates: Keshe Arizona by Jon Bliven

In Arizona we have been granted agreement to support Research and Development for space travel in addition to the factory operation. Plans are in the works to bring on board top scientists from around the world, through positions that allow the technology to be shared with their countries equally. All scientists will align to work together on common goals for the benefit of all.

At the factory we have been performing many different tests with the GANS and dynamic reactors. In addition, we have been creating a lot of GANS of various kinds. These different types of GANS have been used in many of our experiments with dynamic reactors. We are learning to bring science and spirituality together by using the strength of our souls to support what we wish to see.

Would You Like to have a KFSSI Mug?

NEW! KFSSI Gear & Promotional Products - Supplied By Zazzle!

Have you been looking for T-Shirts, Buttons, Pins and Hats from the KFSSI?

We have recently partnered with Zazzle, to bring you KFSSI Gear!

There are many more products available, check out our selection [HERE!](#)

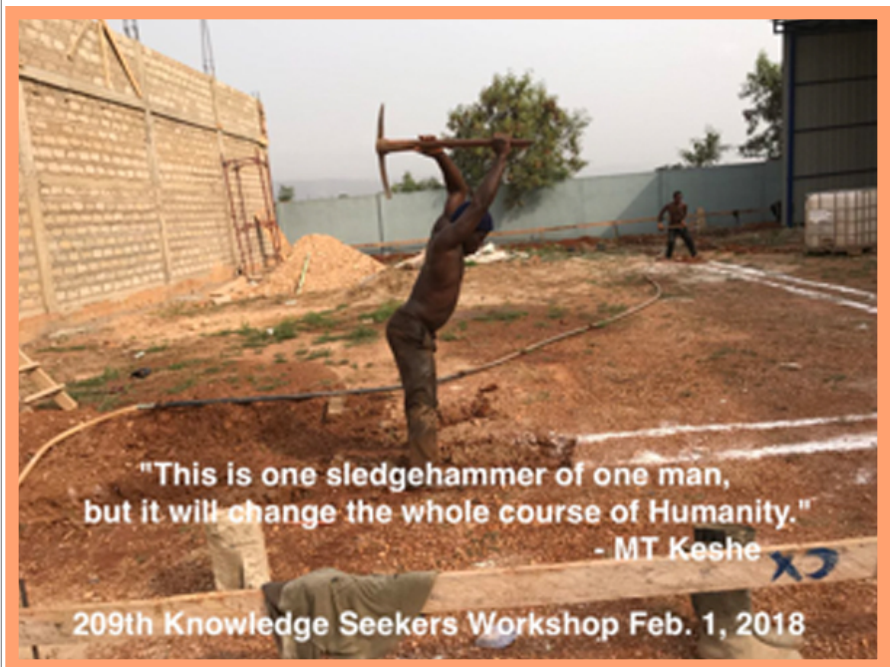

at USA Store
KesheFoundation.org

Zazzle ships worldwide and offers excellent customer service!
Now accepting major credit cards!

Teachings of the Soul

In addition to the factories the foundation is moving the teachings of the soul forward in rapid ways. The teachings change much of the old understandings and brings many things into a new clarity. For some the ideas are not only different but take some time to digest as they are new. We are learning to embrace our creator nature to support the foundations and our advancement.

How I Became a KF Distributor & Certified Instructor

What if you could ask the most puzzling questions about existence - questions about the Universe and Creation, about the true nature of matter, health and more? Suppose that you could be provided clear, understandable answers.

This is what I felt happened to me when I first saw Mr Keshe's videos in 2009. I then immediately ordered his first book and read it not once but three times... I couldn't get enough information about this new technology. This led me to become an **online-student at the Keshe Foundation Spaceship Institute** and later a **Keshe Foundation Products Distributor**

I also applied for a **Workshop Teacher's Certificate** and was approved. This I wanted because I have always enjoyed teaching the knowledge which Mr Keshe has given us so freely and I have found that it is true that the more we give the more we receive.

Alberto Feliciano

Experience as KF Distributor

By Alberto Feliciano

Becoming a Kf Products Distributor is one the the best choices I ever made. It has allowed me to help others in ways that I had never thought possible. If you have been considering becoming a Kf Distributor I encourage you to apply. We need as many people involved in distribution as we can get. Factories are opening all over the world and we need many stores to sell these items.

A few very important tips:

- 1) Customer Service - we must have a willingness to serve, even lose a little money sometimes to keep the customer happy. If a Refund is asked for, honor it immediately or as soon as possible.
- 2) Please be aware that your patience will be tested. Respond to all your email inquiries in a positive manner, ignoring the negative. Thank them for writing and do what you can to help them, no matter what the circumstances or attitude. It helps to remember that this is a work of Love.
- 3) We must learn to work around the small Profit Margin to make the business self-sustaining and provide a reasonable income for our time. Once you are approved as a Distributor by the Keshe Foundation you may write me with your questions. I will share with you the few "do's and don'ts" I have learned in my two years of being a Distributor.
- 4) You can give your customers better prices by ordering in bulk. This saves on shipping. Ordering in quantity is the best strategy to follow.
- 5) Beware that some companies can challenge you with their seller agreements. PayPal will pull money out of your account almost without notice as soon as any one of your customers is unhappy. There are several other good companies which will allow you to accept Credit Cards and have different policies than PayPal.

How You Can Assist to Bring Positive Change

There are many aspects to bringing change to our Planet, and getting the technology to the masses is one of them.

Change will happen when we all do our part, no matter how small.

- Listen to the Workshops.
- Make GANS.
- Build the little, simple devices.
- And above all, get in touch with your Soul. Follow the "small voice within".

You will soon realize that it was all-about the Soul anyway.

Being involved in the Keshe Foundation has been a joyous, fulfilling journey all the way. We are family, and the more that I give to you the more I receive. *It's all about Love.*

Answering Questions about Plasma Technology

By Alberto Feliciano

We all have questions about this new technology - but not everyone has the time to go through the thousands of hours of teachings that Mr Keshe has provided for us.

You will get many calls with lots of questions. Answering those questions is easier than you think because we have great resources to use to seek out the answers. When we do research to find these answers we are also teaching ourselves.

My favorite information resource is <http://www.transformacomm.com/en/plasma/keshe/teachings-index.htm>

I do a "word search" for what I am looking for and then listen to the video time index listed. I always learn a lot in the process. Then I make a note to myself on the question and the answer and in what video or PDF I found it in. This is handy information because the questions are often repeated.

Mr. Keshe, An Important Teacher

With this precious knowledge being available to me, a door to infinity has now opened and can never be closed again. Mr. Keshe has been a very important teacher to me but it's not just him, I know we are all guided by a greater, broader consciousness who didn't chose to manifest their physicality on this planet. They are assisting us in a very deep level, probably by using the 90% of the brain that most people don't use.

When we only look at the surface of an ocean, how can we know what's happening deep within the ocean? I see particles and their movements as merely waves of the ocean. We can play with the waves, if we hit the surface of the ocean with our hands we do change the waves even if it's only slightly. We should not deny physics; the surface of the ocean does exist and is very clear and easy for us to see. The Keshe Technologies to me, are those activities within the deep ocean. The love of the ocean, the "hidden beauty" of the ocean, that is truer to me. Its love that gives rise to forms and particles, like how the "hidden" forces between the planets that give birth to the waves on the surface of the ocean.

Julian Huang

Julian Huang: Keshe Arizona

Being on the Arizona Team **By Julian Huang**

My name is Julian Huang. I'm originally from Taiwan. I moved here to the US about 5 years ago. I first moved to Illinois where I had family. Just like most people, I was lost, chasing dreams that we all deeply know will eventually vanish at the end of life. Gradually, I found that I was not chasing anything anymore. I lost the passion to live. It was like time had stopped for me, it was at that time that I started thinking about the meaning of life. I call it life. This word brings the feeling of being alive, like flowing water. Some people call it reality, this word brings the feeling of some kind of hard structure that cannot be broken.

Now we see how words and knowledge separate themselves from each other, from the Truth which is truly One. It was at that time that I started reading information about what some people call "The Conspiracy," I didn't know if what they were saying was true but it ignited my curiosity. I was just so attracted to information claiming to be "the secrets of reality."

Paul: Keshe Arizona

**Hats, T-Shirts &
More at Our Store**
KesheFoundation.org

I first found the Keshe Foundation when I was online with my brother and cousin looking into “New Age” info. It gave us the feeling of not being alone, like we have some alien family who lives somewhere out there. At that time, I wasn’t very interested in the Keshe Technologies because I was not a very scientific minded person. My cousin Paul on the other hand was very interested in this Technology and had some basic experience with electricity. He decided to build a Magrav, hoping to produce free electricity in the house.

We spent most of our money on the materials needed to make the nano-material, GANS and finally the Magrav. My brother and I helped but Paul did most of the work. That was also around the time that Paul got in contact with Jon, who is the Managing Director at the manufacturing facility in Arizona. With Jon’s generous help, Paul and I were able to move from Illinois to Arizona to work on setting up the facility. It has now been over two years since we moved to Arizona. We have been a part of experiments, had some fun and even some frustrations but ultimately, we have learned a lot. Mr. Keshe teaches well, something in me is now blossoming because of the perfect condition God has sent for me to grow.

I’ve worked at Keshe Manufacturing Arizona for over two years now, one benefit is that now I feel the Christ and I believe that’s what Keshe has been teaching. Its deeper than creating matter, deeper than a flying saucer. One of the biggest breakthroughs I have is not really about coils or GANS balls but to see the Truth that Jesus’ teachings and Keshe’s teachings are one and the same. Words cannot separate them anymore. It’s all just love that manifest in different ways and different forms, different particles and different forces. When we can finally see that Truth, that will be one big breakthrough of this technology. Paul and I are very glad to be part of the Arizona team and the upcoming changes that this technology will bring.
